Southbound	56	PM Peak	19:00
Crossing Movements	11	PM Peak Volume	22
Male	65	Children (primary and secondary)	1
Female	53	Adult	114
		Elderly/Disabled	3

- Notes:
- All surveys were completed between 6am and 9pm
  - "Crossing Movements" are included in "Total Volume", where a crossing movement is recorded, other directions are not recorded for that individual.
  - Estimates of gender (male/female), mobility (disabled/elderly) and age (adult/child) are an indication only and should not be relied upon. They are based on observation not a conversation.
  - AM and PM Peak numbers are for the hour starting at the stated time.
